People interested in BPA's Proposed Summer Falls and Main Canal Hydropower Interconnection Transmission Line and Pinto Ridge Substation project

"I'd like to tell you . . . "

1. Please have your environmental studies look at:

Various natural springs in the area, including Coyote Spring + Railroad Spring.

If this power line can be placed largely on state or federal land, rather than private property, why wouldn't this be done?

2. I need more information about:

3. I have these other comments: We already have one easement through our property, lengthwise, (Avista). We plan to retire to this property, and are concerned about having a second EMF on the property, about the noise of another line when demands for power are high, and about having a second line crossing the entirety of our view. We also spent substantial money to bring our own power in to our future building site underground. Had we known of this proposed project, we would have at least delayed doing this to see what happens.

Please put me on your project mailing list. (You are already on the mailing list, if you have received mailed notices.)
