

Redirecting an Invalid Resale

CBPI

Dec 14, 2022

Mike Steigerwald

Caution on Resale Auto-Annulment

- Resales that fail BPAT verification will automatically be changed from CONFIRMED to ANNULLED.
- However, per the BP, this does not happen immediately. Customers are advised to wait at least 60 seconds before tagging a CONFIRMED Resale.
- This warning applies to any use of the Resale, including a Redirect. The BP is being updated accordingly.

D. Transmission Provider Validation

1. After the Resale is CONFIRMED on OASIS by the Assignee, ~~the Transmission Provider~~ BPA will evaluate the Resale for adherence to the required criteria.
 - a. Resales that fail this evaluation (such as an incorrect contract number in the Sale Ref field) will automatically be set to ANNULLED on OASIS.
 - b. It may take up to 60 seconds for the annulment to occur on OASIS. Assignees are advised to wait an appropriate time before tagging or redirecting the Resale.
