

# BPA Energy Efficiency Weekly Announcements

## June 15, 2023

### New

BEETS office hours moving to new timeslot

Starting Wednesday, June 21, the weekly BEETS office hour will be held from 9:30-10:30 a.m. Pacific time. This is an opportunity for BPA customers to ask BEETS-related questions and/or troubleshoot issues. Office hours will generally be staffed by at least one EER and one COTR. We have screen-share capability in cases where showing is easier than telling. Visit our [BEETS Training Materials & Support Resources page](#) for the WebEx link and information. There, customers can also find a plethora of step-by-step guides and videos. When in doubt, your EER is a great first contact for any questions you may have.

### Events

Energy Smart Industrial: Industrial Motor Systems training

Please join the Energy Smart Industrial, or ESI team June 22, 2023, 10 a.m. - noon PDT Pacific Daylight Time, for a virtual training that covers the principles of industrial motors. This event has been developed for industrial end-users and their utility representatives; designed to review the basics of induction motors, provide a high-level understanding of common energy efficiency opportunities and how to find them, and share information on emerging motor technologies. This training will be recorded and be available for those who cannot attend [here](#).

To join this training or add this to your calendar, click [here](#).

## General

### End of Rate Period EEI needs assessment

Does your utility have more energy efficiency incentive, or EEI, than you can spend by the end of the rate period—even beyond your maximum carryover amount? Or does your utility need additional EEI to fund your efficiency projects? If yes, we would like to hear from you to see if additional energy conservation projects can be completed and reported this rate period to avoid stranded EEI funds...[More](#)
