

BPA Energy Efficiency Weekly Announcements

June 30, 2022

New

BEETS is on track to have all customers report in the new system by the end of calendar year 2022

The BPA Energy Efficiency Tracking System, or BEETS, project has reached a critical milestone; all the major pieces of the system are up and running and the final phase of the project is underway. This phase will include executing a 2-month-long end-to-end test that includes utilizing the Utility Focus Group, a group of representative customers, to test the system and validate that the system supports customer needs. We will be holding a webinar in late July to demonstrate the system to the broader group of customers and answer any questions. Keep an eye out for the webinar information that will come out in the announcement in the next few weeks, and if you have any questions, please contact your energy efficiency representative, or email BEETS@bpa.gov.

Events

BPA webinar: Utility Potential Calculator Q&A

BPA is hosting a Q&A session from 10 — 11 a.m. (PDT), Thursday, July 7, to answer any questions utilities have about our Utility Potential Calculator, or UPC, presented during a webinar on June 16. We encourage utilities to first test out the tool, then join the July 7 webinar with questions... [More](#)

The tool and user guide are live on this site under the Utility Potential Calculator section: www.bpa.gov/energy-and-services/efficiency/utility-toolkit.

BPA webinar: Option 1 Custom Industrial Impact Evaluation results

Please join BPA and Evergreen Economics on Thursday, June 30, from 10 — 11 a.m. (PDT), for a webinar sharing results— including key findings and recommendations— from the impact evaluation of BPA's Custom Industrial portfolio for Option 1 utilities... [More](#)
